

optimail

*The new generation of discount
Postage Meters*

from Francotyp Postalia Australia

Great design combined with state of the art technology makes the optimail your optimal office companion. No problem for optimail, the professional electronic postage meter does an excellent job and with distinctive contemporary design, looks good doing it.

First class print quality every time.

Made possible by the high-quality ink-ribbon cassette, which produces a clean, clear image at the press of a button and a quick replacement cassette ensures the cleanest stamping on all materials. The type of mail is called up for printing when air mail or off peak are selected. The Unique 2D barcode gives you the customer a 2.5% discount on postage.

A freely programmable maximum postage value protects against unintentional incorrect franking. The Low Postage warning indicates when your postage is getting low and assures you that you don't run out. Reloading the meter is as easy as pressing a couple of buttons, 24 hours a day, 7 days a week.

Changing the sender cliché at the press of the button.

In addition to a standard sender cliché, up to a further 8 clichés can be selected at a time from memory. The sender can also announce special activities in this cliché, or even send a greeting. There are hardly any limits on the variety. Check out these examples.

One for all: Whether a company cooperative or a joint practice

Ideal use with several different senders in one location. Up to nine individual companies can be called up individually by pressing a couple of buttons. Electronic control and invoicing memories (9 cost account) guarantee the correct charging of the postage used in each case. All information regarding cost accounts and registers can be printed with the postage meter by simply pressing a button or viewing on the LCD.

Never change the date again.

The internal quartz time registration not only ensures that the correct date automatically appears on the impressions. It also shows the time when the meter is not in use.

Inbound mail.

Tired of not knowing when mail was received in the office. Not any longer with the inbound mail feature, at a press of a button the inbound mail stamp puts the date and time on the items as they come into the mail room. With additional an area for internal office use.

Optional Interfaced 5 Kg Scale.

Franking incorrect values on a item is a thing of the past with the friendly, easy to use optional interfaced 5 Kg Scale, including presort mail, parcels and international items.
