

The new generation
of digital Postage Meters

from Francotyp Postalia Australia

"At a glance" now means what it says! With the display screen of the new **ultimail**!

Your window to an entirely new world of mail franking ...
with the extra-large display screen of the all-new **ultimail**. Discover the pioneering Francotyp-Postalia concept for franking your mail, with the superior ease of operation and outstanding flexibility offered by the brand-new **ultimail**.

ultimail delivers all the advantages of an electronic franking system in a compact and practical package. The uniquely simple program enables you to easily navigate the various options and registers. A back-lit screen displays complete information about every franking operation – at the touch of a button.

From the calculated postage amount, to an accurate image of the selected advertising slogan, to the status of currently available postage: All information is clearly presented and easy to interpret. Leave nothing to guesswork.

The integrated modem enables you to load new postage at any time, day or night. Never again join the post office queue to loan more postage. Welcome to a new world of franking, from FP.

ultimail – anything is possible.

ultimail – uncompromising performance, from the beginning.

A modular design enables you to configure your **ultimail** according to your individual needs. Choose from two basic models – **ultimail 60** (60 letters/minute) or **ultimail 90** (90 letters/minute) – and then select from a variety of options to build the system you need. Anything is possible, if you are looking for uncompromising efficiency and ease of operation.

ultimail – a world of options.

Outstanding design in a compact package. The result: Innovative franking technology in a space-saving format. Modular components assure your **ultimail** will meet your needs today – and tomorrow. Configure the system to handle 30 to 500 letters a day. Efficiently manage your postage costs with the integrated department account feature. Share the **ultimail** with office partners, or manage your postage costs by department.

Put your message on your envelope.

Use your outgoing mail to advertise for you.

The **ultimail** can store up to six advertising images or messages that you design – and select as needed.

But there's even more:

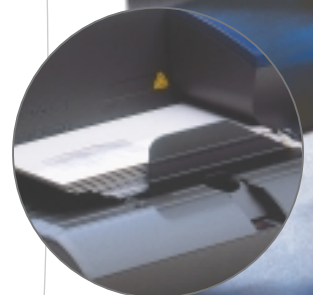

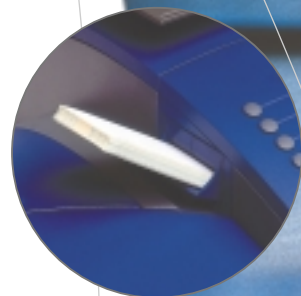

Edit and add a text message at any time. Compose your message on the keyboard to give your customers and clients up-to-date information about holidays, trade fairs or special offers.

An easy, no-cost method of spreading the word.

A card system, that meets every need.

ultimail offers superior security, and the flexibility you need. The master-card can be used to activate all **ultimail** functions. Optional user-cards authorize the holder to frank only from pre-determined department accounts.

New advertising images or postage rate tables can be loaded with special chip-cards.

What makes **ultimail** a star:

Features for flexibility and efficiency.

Scale – A space-saving integrated 5-kilogram scale precisely weighs every letter, automatically calculates the correct postage, and sets the franking machine accordingly.

Label dispenser – Indispensable for thick letters and small packages. Enter the number of labels needed, and let **ultimail** print and eject adhesive labels with postage.

Feeder – An automatic feeder separates and seals same-sized envelopes from a stack.
